(Information Technology Engineer)

A - 905, Sterling Blooms,   **Email:** shahkalpesh23@gmail.com
Opp. Vimal Garden, Rahatani, Pune – 411017.   **Phone:** +91-9860 54 51 52

Career Objective

Looking for a secure position in a company offering professional growth and
career enhancing opportunities in the field of software application development.

Career Summery

- Have a knowledge of OOPS, C#, JavaScript, Typescript, Angular 2+, AngularJS 1.3.4, KnockoutJS 3.4.0, Nunit, QUnit, Selenium Tool, ASP.Net, ASP.NET Core 2.2, Web Services, RESTful Web API.
- Being a developer I am very adaptable to learn new technologies, also new features of existing technologies in parallel with regular work. Am always ready to take up new challenges.
- Got **SPOT award (in Nov-13)** for outstanding performance and exceptional contribution at work.
- Got **Employee of the Month (in August-14)** award for developing an application to perform Daily Health Check on QA environment and sending a Consolidated Report automatically. Also for   showing consistent quality work and taking ownership of task assigned and delivering with quality and in time.
- **Got Surpass Award (for 3rd Quarter of 2014**) for exceptional performance in developing new claim flow (No Enrollment Flow) with no issues logged in its Quality Control phase.

- **Experience: (07 Years and 04 Months)**

FIS Global (India) Pvt. Ltd.
Westend Center One, Aundh – Baner road, Aundh, Pune.
From 18/07/2016 to till date
Working profile: Senior Engineer – Product Development

Tavisca Solutions Pvt. Ltd.
EON Free Zone, Kharadi, Pune.
From 06/07/2015 to 15/07/2016
Working profile: Software Developer

Synechron Technologies Pvt. Ltd.
Hinjawadi, Pune.
From 07/08/2012 to 03/07/2015
Working profile: Associate - Software

Technical Skills

Programming Languages	C#, JavaScript, Typescript
Data Access Technologies	ADO.Net, LINQ, Entity Framework
Middle Tier Technologies	RESTful Web APIs, ASP.NET Core 2.2 services.
User Interface Technologies	ASP.Net, Angular 2+, AngularJS, KnockoutJS, jQuery, Bootstrap
Database Technologies	Non-SQL database (Redis Store), SQL Server & SQL Server CE
Testing Tools Used	NUnit, QUnit, Jest, MoQ, Selenium(Web Driver)
Design pattern	IOC, Nancy, MVVM, AutoFac
Repository	TFS, GIT, BitBucket, Perforce

Professional Summary: (07 Years and 04 Months)

Project Name: Adaptiv Enterprise Risk (Enterprise Risk UI)
Client: CIBC Bank, ING Group. (Investment Banks)
Key Role: UI Developer, Middle Tier developer.
Technical Skill used: Yarn(Package Manager), **Typescript 2.3, Angular 2+, Angular Material Design, Angular - PlotlyJS, Angular – ag-Grid, .Net Core 2.2, C#, TeamCity, RabbitMQ, Redis Store (Non-SQL database).**
From July-2017 to till date

- Joined the Account as Senior Engineer – Product Developer to initiate a team of Fusion UI (Next-gen UI) from India region.

- I was successful in creating an initial confidence required to establish and grow this team and represent as Point of contact from India region.

- My self-learning approach helped me in learned Angular 4, Typescript and Non-SQL database concepts which were key requirements to kick-off this project.

- I Played a role of team leader and guided two other team mates who joined later on to Next-gen UI application.

- I was appreciated for my quality of work in Angular 4 and the pace of learning new concepts and implementing them in our project.

- My contribution in developing and delivering some important stories like Task Distribution – Auto/Manual refresh and Investigation Aspects – creating Pivot Grid, Charts, Histograms views using third party packages highlighted my level of expertise in Web UI development as was appreciated for the performance.

Project Name: GBOP – Benefit Access Portal
Client: Wespath Methodist Church.
Key Role: UI Developer, Middle Tier developer.
Technical Skill used: **.Net Framework 4.0, C#, JavaScript, AngularJS, BootStrap, LINQ, BizTalk, Oracle SQL.**
From July-2016 to July-2017

- Joined the Account as a Senior Engineer - Software Developer, I gave my best in identifying my roles and responsibilities that I fit into and push myself hard to understand the business domain of the project.

- I was given the responsibility to develop UI modules of the application using HTML and Knockout.js library, I took complete ownership of the UI modules so that it can help me in understanding the project structure.

- I have proven to be a quick learner by learning and understanding the basic working of BizTalk server 2013 and had used it for developing Batch Upload module business logic implementation in BizTalk tier.

- Also, I have received client appreciation for helping them in resolving the performance issue related to pagination by minimizing the response time from 6 minutes to just few seconds.

- I have successfully communicated with the stake holders of the project in both verbally and in writing, asking queries and resolving them keeping the intension of higher product quality in mind. Along with identifying handful number of missing points in the FRD and notified it to the client to make sure its recorded and documented.

- Actively contributed in project QA support by fixing defects along with communicating with team members as well as stake holders whenever required to resolve the defects effectively. Also, I continued rigorous testing at my level and fixed few internal issues in the project which were not noticed while SIT testing to ensure optimum quality of delivery.

Project Name: Innventia - IMS (Inventory Management System for Hotel - property)
Client: Akbar Travels Pvt. Ltd (Middle East Asia), Paris Travels Pvt. Ltd (Europe)
Key Role: UI Developer, API Developement
Technical Skill used: .Net Framework 4.0, C#, RESTful Web API, AngularJS, BootStrap, LINQ, NUnit.
From July-2015 to March - 2016

- Joined the Account as a Software Developer, My first task was to understand the business of the application as quick as possible which was completed within 3 working days and I was on board for development within a week of joining.

- I took the ownership for development of my user story right from the beginning till its delivery in all aspects and followed TDD approach till its completion.

- Also took complete responsibility of the task right from its UI development till database design and configuration, which eventually helped me in understanding and getting complete visibility of the architecture used in the application.

- Apart from working on given assignment, I was parallely involved in solving some of the production issues being a priority along with identifying gaps on the application structure.

Project Name: iCare APAC – Consumer BlackListing
Client: Asurion (US)
Key Role: UI Developer
Technical Skill used: .Net Framework 4.0, C#, JavaScript, AngularJS, BootStrap, LINQ, NUnit.
From Oct-2014 to 03/07/2015

- Took Complete responsibility of developing web API's and communicating it using core AngularJS http services and JSON objects to display it on UI.

- Contributed in implementing business logic for the application and followed TDD approach to achieve completed testable business rules.

- Proactively involved myself in unit testing of the application so as to identify issues as early as possible and resolve them quickly.

Project Name: iCare APAC (Mobile Insurance Application)
Client: Asurion (US)
Key Role: UI Developer
Technical Skill used: .Net Framework 4.0, C#, JavaScript, KnockoutJS, JQuery, BootStrap, LINQ, NUnit, QUnit, etc.
From Aug-2013 to 03/07/2015

- Joined the Asurion account as a junior resource. I have consistently demonstrated excellence & quality in work. Contributed as a Key resource in developing and delivering various User stories by following all processes and guidelines that helped me in delivering quality work within the deadlines. As the project I worked on was a Multi-Tenant application, I provided my team the flexibility to work with multiple clients at a single time.

- Also took ownership in upgrading the Automation Framework in ability to conduct performance testing for web application.

- I was also awarded with **Employee of the Month award in august-2014** for developing an application to perform Daily Health Check on QA environment and sending a Consolidated Report automatically.

- As this project follows "**MVVM Design Pattern**" and "**Test Driven Approach**" I learnt Javascript library KnockoutJS, JQuery and Unit Testing framework NUnit, QUnit and wrote Test cases for all the clients efficiently which made our project to come on top in SONAR (Code Quality Test Tool).

- Also used coverage tools like Dot Cover, NCrunch to give 100% code coverage for all the clients.

- Being flexible to take any work, apart from developing User stories also worked for Supporting Applications like SMT (Script Maintenance Tool) and Setup Verification Tool.

- Attended training's and passionately followed the guidelines of senior people and implemented in our projects.

Project Name: iCare APAC Automation Framework
Client: Asurion (US)
Key Role: Application Developer
Technical Skill used: .Net Framework 4.0, C#, Selenium Remote Control, Web Driver.
From Dec-2012 to Aug-2013

- I was awarded with SPOT AWARD for outstanding performance and giving the demonstration to the clients exceptionally well. Also got appreciation from our clients regarding exceptional performance of the framework.

- Though I was new to Selenium tool I undergone training for a week and grasped it fast, also efficiently used it for developing Automation Application.

- I Played role of key resource in designed the entire framework architecture, faced many challenges and tried to troubleshoot the issues as quick as possible.

- As the project for which the framework was developed was a Multi-Tenant application, I made it up and running in very short period of time for seven new APAC clients with three environments for each client as well.

Educational Qualification

Qualification	Grade	Institution	*University* / Board
B.Tech (IT)	Distinction	Symbiosis Institute of Technology, Pune	Symbiosis International University
Diploma (IT)	First Class	JayawantRao Sawant Polytechnic, Pune	MSBTE Board
S.S.C.	First Class	Shreemant ShivajiRaje English Medium School, Phaltan, Dist – Satara.	Maharashtra Board

Personal Information

Date of Birth   :   23rd March 1991
Father's Name   :   Udaykumar Walchand Shah
Languages known   :   English, Hindi, Marathi
